## Project Design Phase-II Technology Stack (Architecture & Stack)

| Date 21 October 2022                  |                  |  |
|---------------------------------------|------------------|--|
| Team ID                               | PNT2022TMID18022 |  |
| Project Name Plasma donor application |                  |  |
| Maximum Marks 4 Marks                 |                  |  |

## **Technical Architecture**

**Table-1: Components & Technologies:** 

| S No | Component                       | Description   | Technology              |
|------|---------------------------------|---|-------------------------|
| 1.   | User Interface                  | <ul> <li>The user creates an account or registers in the UI.</li> <li>Goes through the UI and view details</li> </ul> | HTML, CSS, Python Flask |
| 2.   | Chatbot                         | Used to clarify user queries  | IBM Watson Assistant    |
| 3.   | Data maintenance                | For storing, maintaining, modifying and retrieving the user's details   | MySQL                   |
| 4.   | Confirmation Email              | Sending a confirmation email to users they have registered for donation and to check the availability of plasma       | SendGrid                |
| 5.   | Cloud Database                  | For storing the appointment, donation details and user's details  | IBM DB2                 |
| 6.   | File Storage                    | File storage requirements   | IBM Block Storage       |
| 7.   | Infrastructure (Server / Cloud) | To deploy an Application on Local System  | Kubernetes              |
